

# Design Pattern: Increase Multicloud Security Effectiveness

Version 9

Published 8/10/2017 by [tpeluso](#) Last updated 1/12/2018 10:00 PM by [nilamkhacharia](#)

---

Establish a secure edge perimeter by leveraging edge-based partner ecosystems to deploy fundamental security services. Install edge repositories to ensure that data prohibited from being stored in the cloud can be rapidly accessed by cloud-based applications.
